

SCC Will Launch its Own Web Site Soon!

One of our goals this past year was to develop our website. We have been constructing the site and with the selection of a new logo coming soon, we will launch it at the SCC Post Graduate Course in Québec City on June 17, 2005. The site will initially be launched in English only, and the French version will be available later in 2005. The website will contain important information to SCC members such as the SCC guidelines for training requirements in colposcopy, our mission statement, bylaws, committees, corporate support, executive council, how to find a member, history of SCC Presidents, Officers, and policies. Those interested in joining the SCC can access the membership application form and a description of benefits of membership. Other areas of interest and information, such as brochures, patient education, CME courses, conferences, seminars, education, past issues of the SCC News, links to other relevant sites will also be available.

Our goal is to make the site as user friendly as possible with an emphasis on information and education both for the public, SCC members, physicians and other health care professionals involved in colposcopy and colposcopy clinics. Cervical cancer screening programs are mainly a provincial responsibility and we hope to have information pertaining to these programs from each province represented on the site. The SCC website is your website. We welcome your suggestions for content and improvement.

We would like to acknowledge and thank the Society of Obstetricians and Gynaecologists of Canada for their continued support and for dedicating their web designer, Mr. Nikolas LeBlanc, who has created a professional and user friendly website.

Calendar
